## Contents of this file

1. Tables S1 to S2

2. Figures S1 to S6

## Introduction

Table S1 specifies the CMIP6 models used in the main text, including Figures 1-4. Table S2 specifies the CMIP5 models used in Figures S3-S6. Figures S1-S2 reproduce Figures 1-2 from the main text, but with each model’s changes normalized by that model’s year-to-year standard deviation. Figures S3-S6 reproduce Figures 1-4 from the main text, but for CMIP5.

---

MRI-ESM2.0 <sup>c</sup>	MRI	Yukimoto et al. (2020a, 2020b)
NorESM2-LM <sup>d</sup>	NCC	Seland et al. (2019); Schwinger et al. (2020)
UKESM1.0-LL	MOHC	Tang et al. (2019); Jones (2019)

<sup>a</sup>SM<sub>d</sub> is not available.

<sup>b</sup>We use r101 for 1pctCO<sub>2</sub>, since it is the most up-to-date and matches 1pctCO<sub>2</sub>-rad.

<sup>c</sup>We use i2, since i1 lacks carbon cycle variables (S. Yukimoto, pers. comm.)

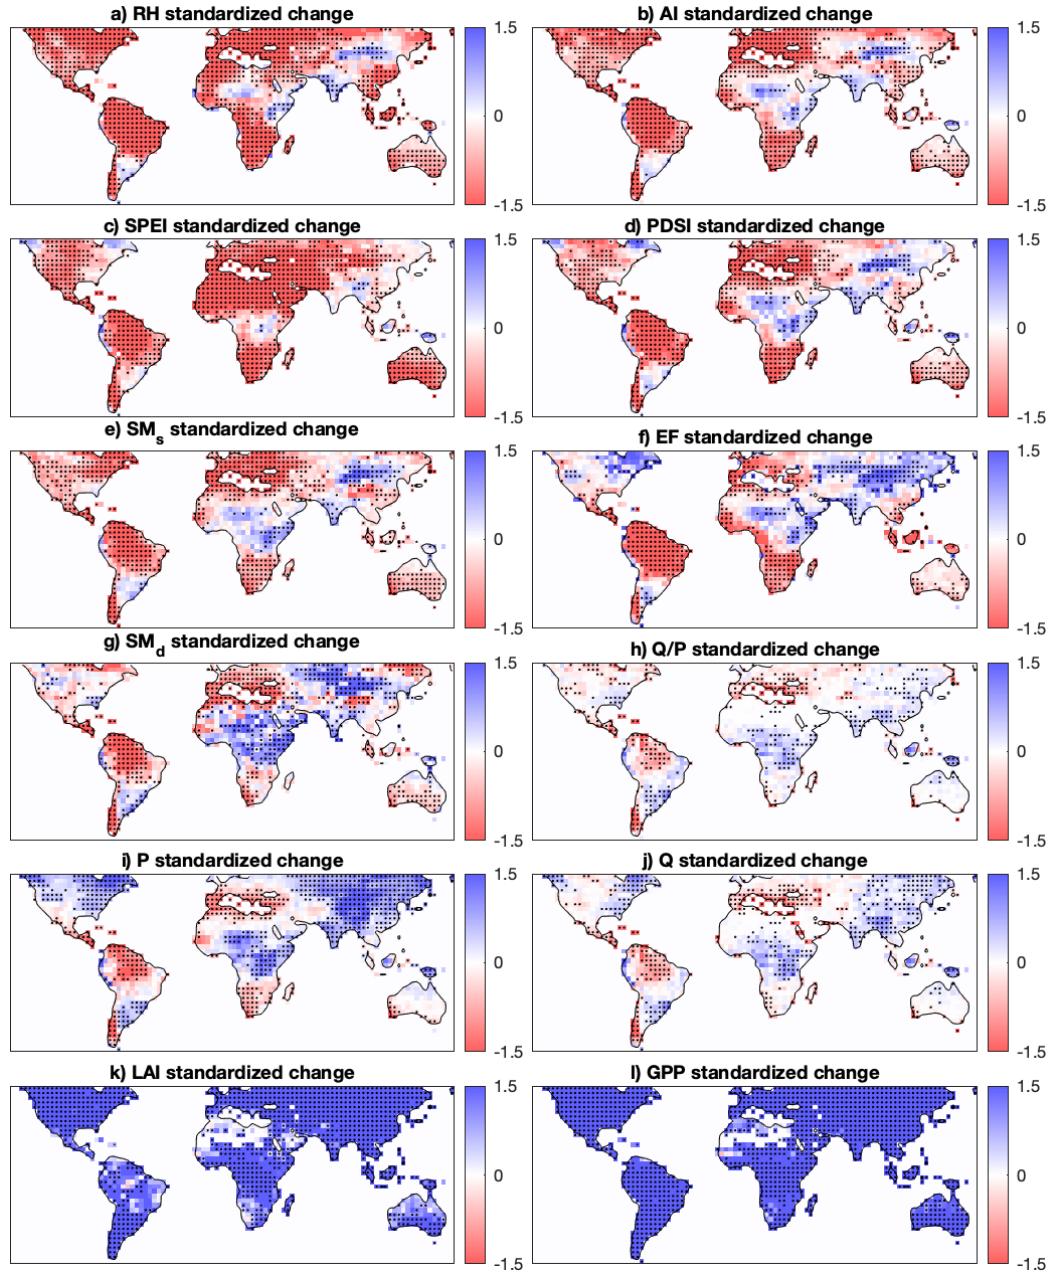

<sup>d</sup>Base period is years 2-31, since part of year 1 is missing for some variables.

**Table S2.** CMIP5 climate models used for Figs. S3-S6

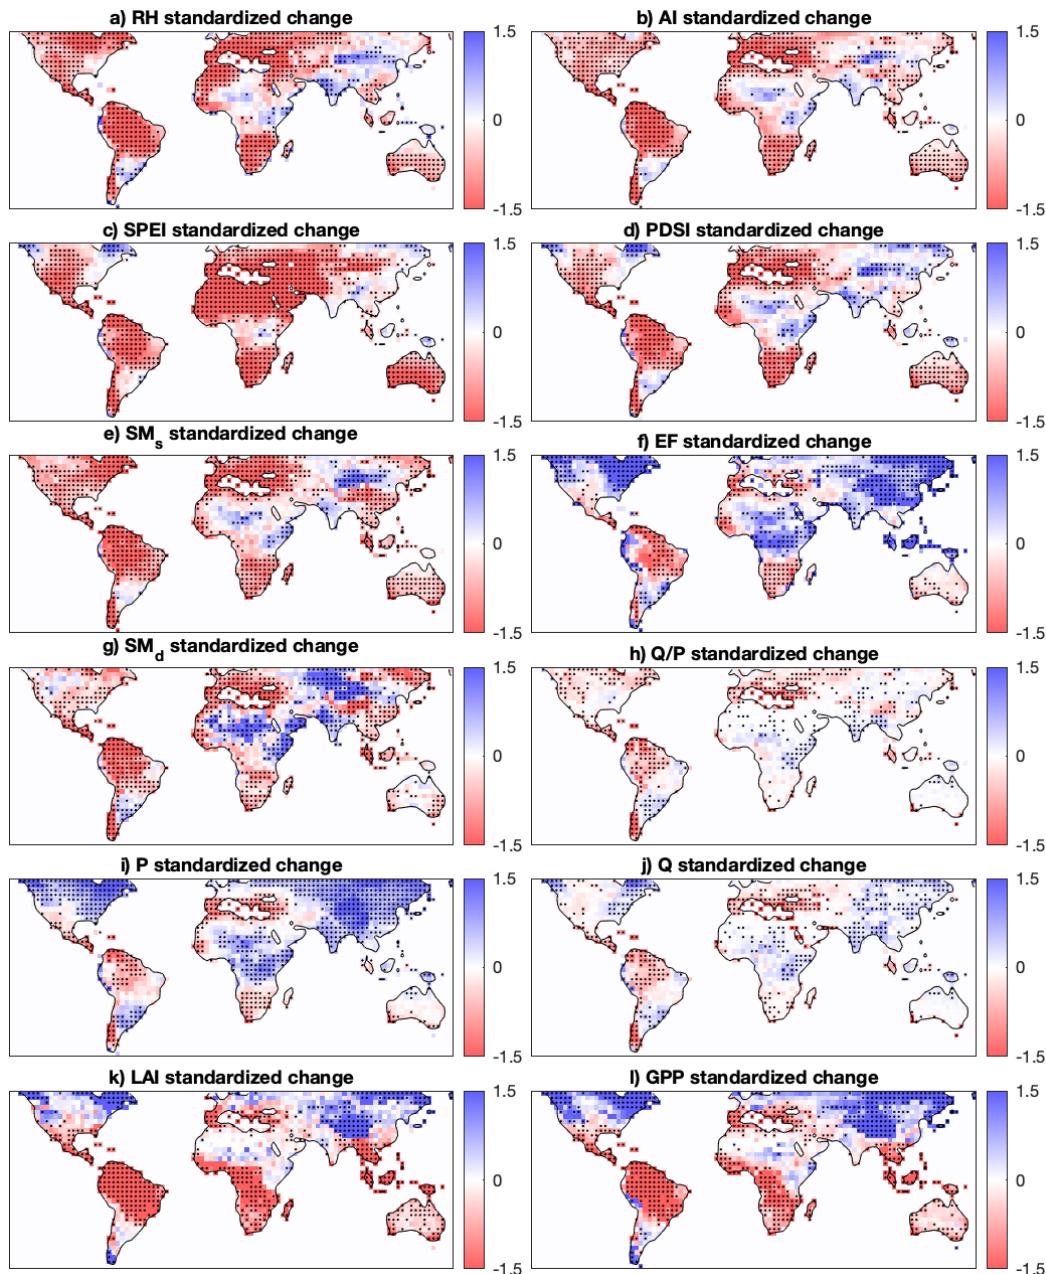

Model name	Institution
BCC-CSM1.1	Beijing Climate Center, China Meteorological Administration
CanESM2	Canadian Centre for Climate Modelling and Analysis
CESM1(BGC)	Community Earth System Model Contributors
GFDL-ESM2M	NOAA Geophysical Fluid Dynamics Laboratory
HadGEM2-ES	Met Office Hadley Centre
IPSL-CM5A-LR <sup>a</sup>	Institut Pierre-Simon Laplace
IPSL-CM5A-MR <sup>a</sup>	
MPI-ESM-LR <sup>a,b</sup>	Max Planck Institute for Meteorology
NorESM1-ME	Norwegian Climate Centre

<sup>a</sup>SM<sub>d</sub> is not available.

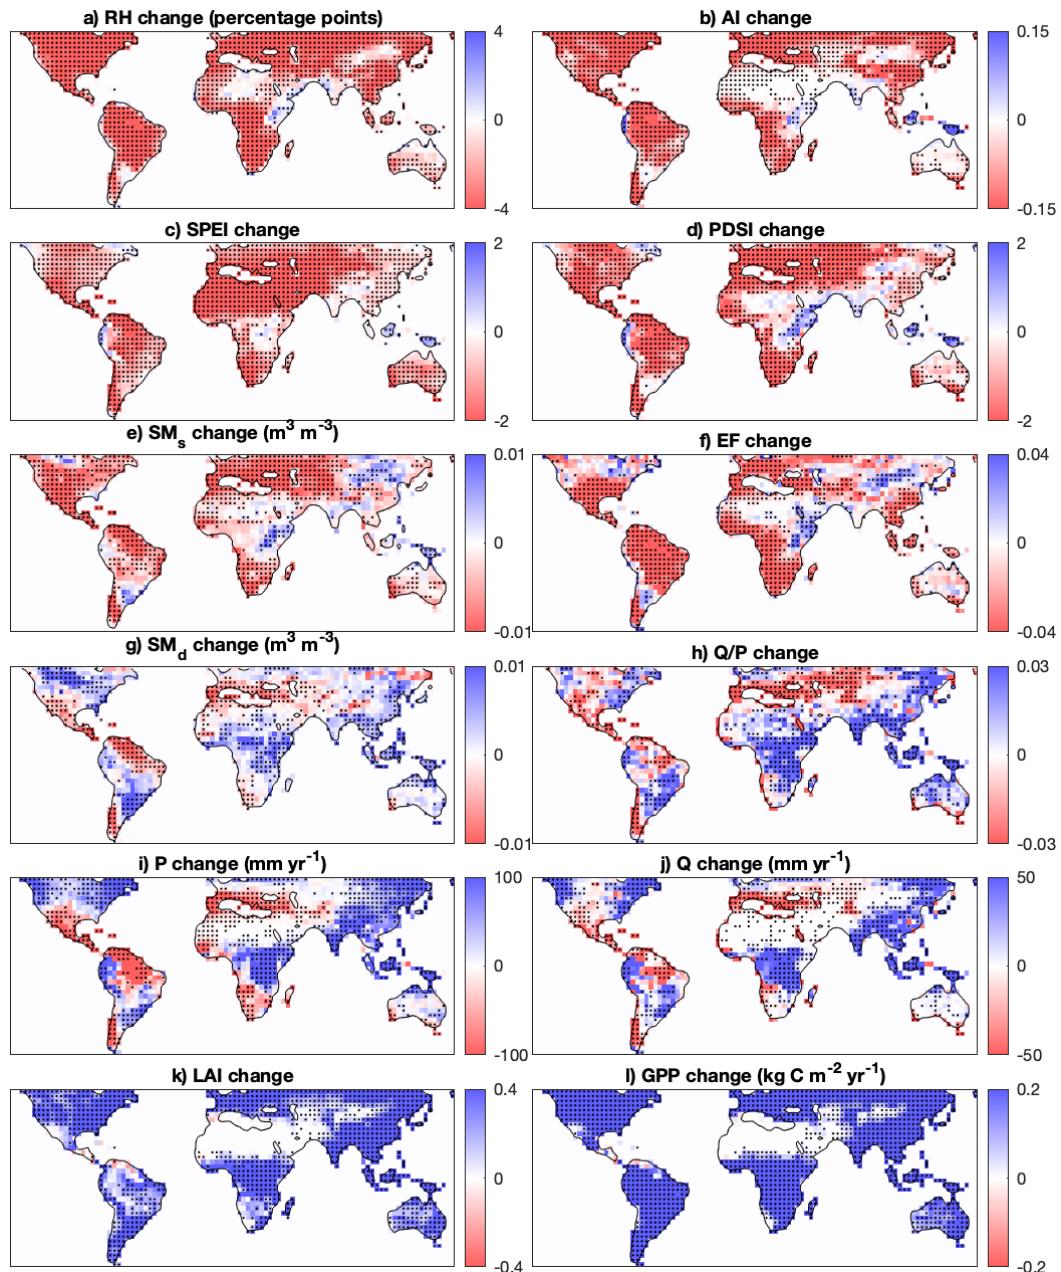

<sup>b</sup>SM<sub>s</sub> is not available.

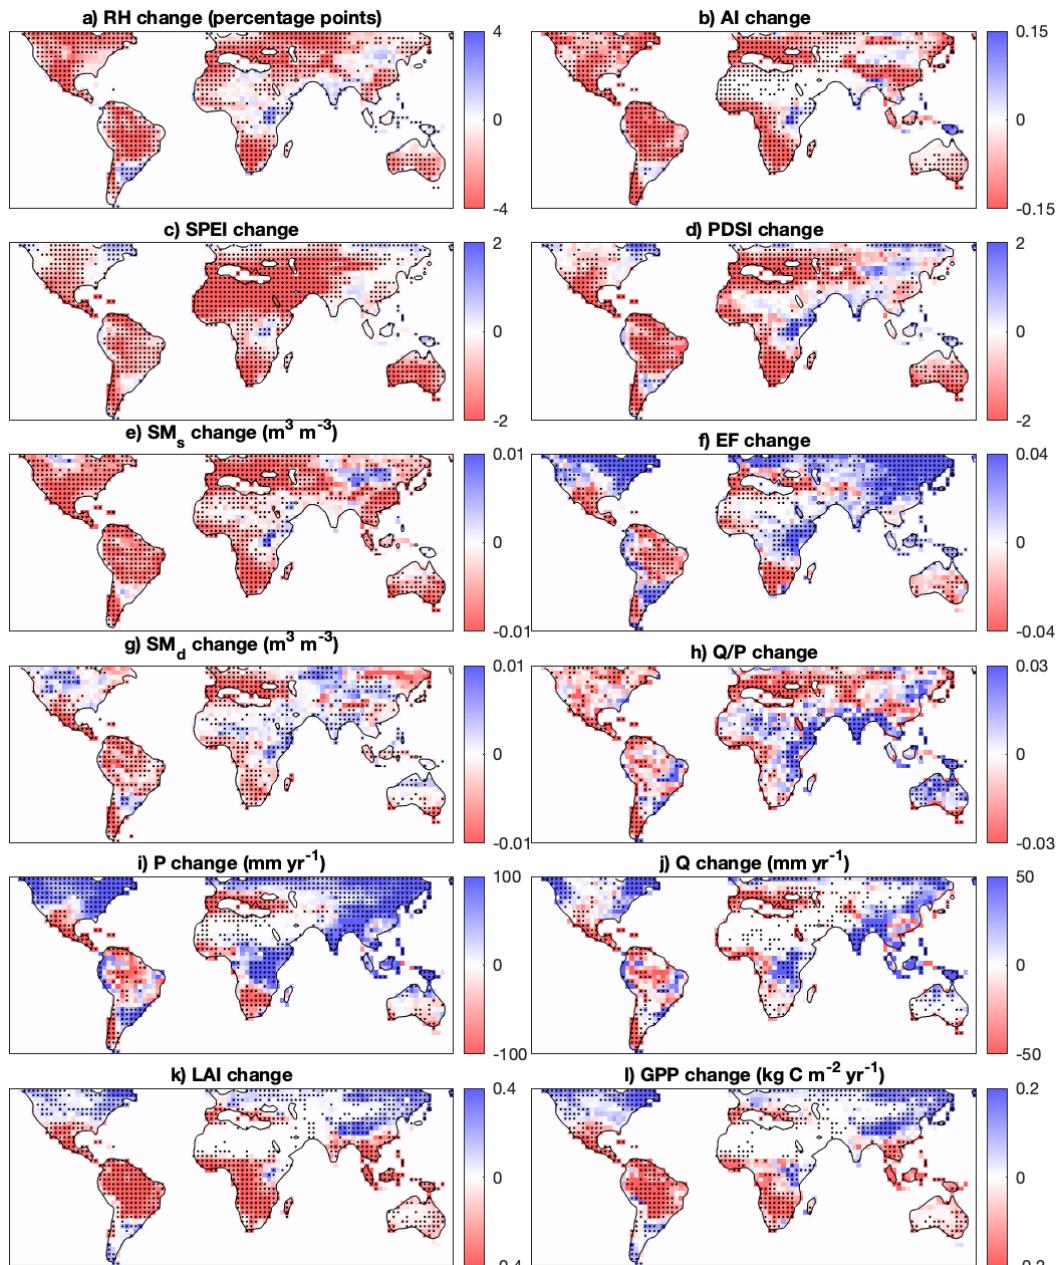

**Figure S1.** As Fig. 1 of the main text, but each model's response is normalized by that model's interannual standard deviation before the multi-model median is taken. Annual  $Q$  each year is defined as annual  $P$  minus annual ET; this is not strictly correct (due to storage) but should capture the magnitude of interannual standard deviation of  $Q$ . Annual EF and  $Q/P$  are each defined as the ratio of the yearly values of their numerator and denominator. “Interannual variability of AI” is represented by interannual standard deviation of  $P$  over climatological  $E_0$ .

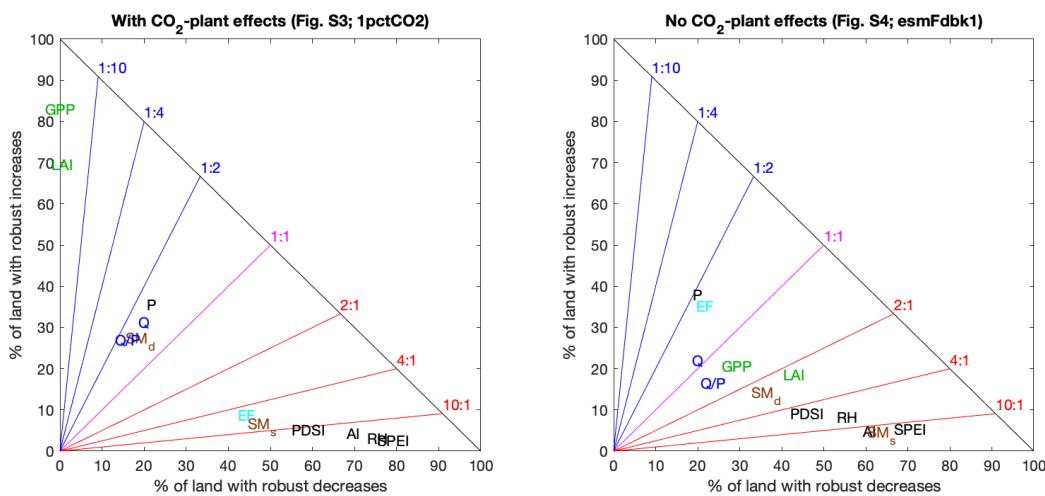

**Figure S2.** As Fig. S1, but for Fig. 2 of the main text (1pctCO2-rad experiment.)

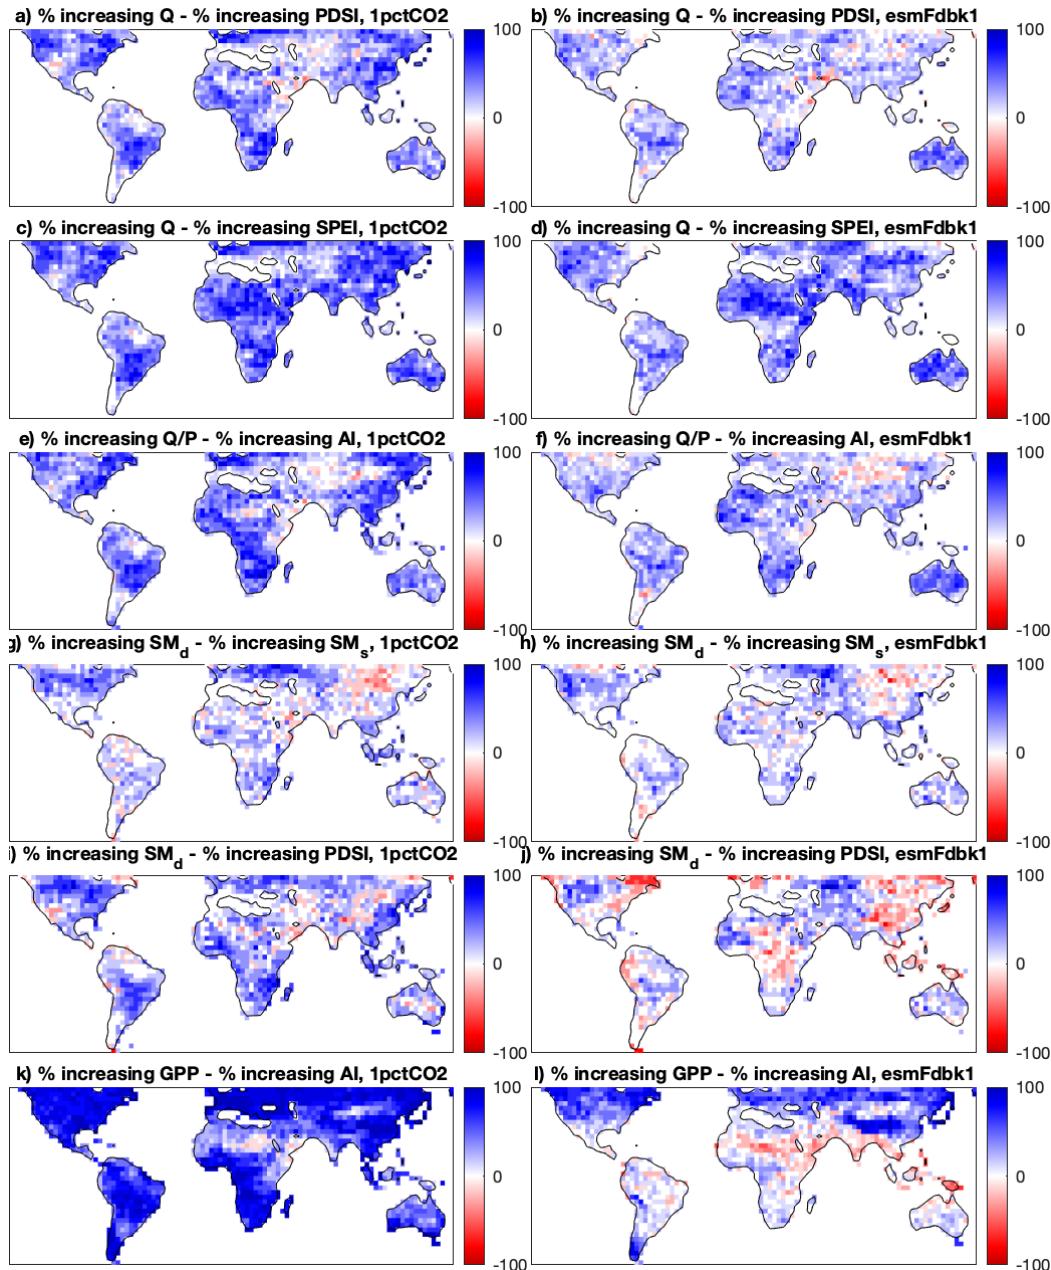

**Figure S3.** As Fig. 1 of the main text, but for the CMIP5 models in Table S2.

**Figure S4.** As Fig. 2 of the main text, but for the CMIP5 models in Table S2, using the esmFdbk1 experiment (identical to 1pctCO2-rad, except for the name.)

**Figure S5.** As Fig. 3 of the main text, but for Figs. S3 and S4.

**Figure S6.** As Fig. 4 of the main text, but for the CMIP5 models in Table S2.
