

## Lead Screening Kit Consent Form

The Indiana Collaboration for Lead Action and Prevention (ICLAP) is a group of researchers studying lead in homes and the environment in Indiana. Lead is a toxic material that usually comes from old paint or lead-contaminated soil. It is particularly more harmful for babies and young children. This form gives us permission to test samples that you collect from your home for lead. The form describes the testing process and how we will use the test results.

**What you will do and what we will do:** After you sign this consent form, you will receive a Lead Sample Collection Kit. The kit has directions, and our website ([leadscreeningkit.com](http://leadscreeningkit.com)) has videos with instructions for collecting samples of paint, soil, water and dust from your home. After you collect the samples, return the kit to one of the drop-off locations. We will test each sample for lead using an instrument that can detect lead in solid materials. We will send you a report within 4 weeks. If there are any elevated results indicating lead hazards in the home, we recommend you contact your local County Health Department Environmental Division for a free and comprehensive Home Lead Risk Assessment. All these services are free.

**Privacy and Confidentiality:** We will use combined results from many homes to understand where lead still exists in our community. A risk of participating in this study is that someone outside the study might see your name, address, and the test results from your residence. Your information will be protected as best as possible from people outside the study team, and any information we publish or present about the study will not include identifiable information about any study participants. When the data analysis is done, we will erase all personally identifiable information about study participants.

**Risks:** If you are a homeowner in the state of Indiana, and you know that your home has lead paint, you must disclose this information when selling or renting your house, and this could affect the value of your home. Renters do not have this obligation.

**Benefits:** You could learn important health and safety information about your residence. If there is a potential hazard from lead in the home, we will provide information about steps you can take to reduce lead exposure, how you can learn more about where lead is present in your home, and how you can ensure that people and pets living in the home are safe.

For more information, please contact [REDACTED]; [REDACTED], Program Manager for Northern Indiana, [REDACTED]; or [REDACTED], Program Manager for Central Indiana, [REDACTED] or 317 [REDACTED]

**Presence of Lead:** I understand that if I am a homeowner and learn that lead is present in my home, I will have an obligation to disclose the test outcome when I sell or rent the house.

Please Initial: \_\_\_\_\_

**Elevated Results:** If I have an elevated result, I would like my results to be shared with the Marion County Health Department. (Check one) ☐ Yes ☐ No

**Permission:** I give my permission for the Indiana Collaboration for Lead Action and Prevention Team to test soil, dust, water, and paint samples from my residence:

\_\_\_\_\_  
Print Name

\_\_\_\_\_  
Address (Street; City, State Zip)

\_\_\_\_\_  
Signature

\_\_\_\_\_  
Date

\_\_\_\_\_  
Email (required)

\_\_\_\_\_  
Phone

**Do children under the age of six live or frequently visit (two weeks in a year) this home? (Check One)**

☐ Yes ☐ No If yes, how many? \_\_\_\_\_

**Year Home was Built (Estimate):** \_\_\_\_\_
